Accessibility Design Guidelines

Our website has been designed with the following accessibility guidelines in mind:

- The standard font used throughout the site has been chosen to be easily legible.
- Wherever possible, we use live text instead of graphics to reduce the download time of pages and increase your control.
- Our pages are designed to display without horizontal scrollbars when they are viewed at a screen resolution of 1024x768 pixels.
- No information is exclusively conveyed using color. This doesn't mean that colors are not used to organize information; instead it means there are also other, non-color dependent ways of doing this.
- All images and hyperlinks, where appropriate, have an alternative text attribute. This means when an image or hyperlink is conveying important information its content is described with an alternative text.
- We comply with [Section 508](#) and [Web Content Accessibility Guidelines \(WCAG\) 2.0 A and AA](#) referring to website accessibility standards.
